Team

Mohamed Mahmoud Abdel Bary - Team Leader - Apps, Settings, Permissions & Design
Mohamed Essam El-Din Youssef - Sales & CRM
Ahmed Mahmoud Mohamed - Inventory & Data Upload
Fathy Adel Fathy - Purchase, Quality & Testing
Omnia Haitham - Accounting & Finance

Prepared 25 October 2026 | Business period 1 May 2026 – 30 September 2026 | Odoo 19.0 (Enterprise edition assumed)

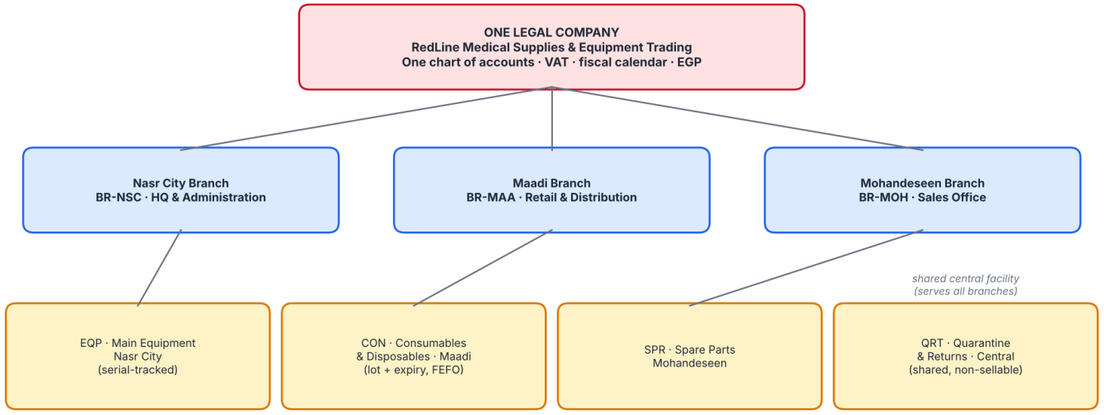

All companies, partners and transactions are simulated; nothing was installed or tested on a live Odoo server.

Company profile

Who RedLine is

نبذة عن الشركة

- Cairo-based trader of medical equipment, consumables, disposables and spare parts for hospitals, clinics, laboratories and providers
- HQ: 45 Makram Ebeid St, Nasr City, Cairo, Egypt
- Email: info@redlinemedical.com.eg | Currency: EGP
- One legal company, 3 operational branches, 4 warehouses
- 24 products: 10 equipment (serial), 10 consumables (lot + expiry), 4 spare parts
- 13 customers and 6 vendors (illustrative, not real institutions)

Branches are management/analytic units (Odoo branch records where the edition supports them, otherwise analytic plan 'Branch' + security groups).
Warehouses are stock structures. Only the legal company holds accounts, taxes and fiscal periods.

87
sales orders in 5 months

27
purchase orders

20.9%
gross margin (simulated)

Business background and current challenges

الخلفية والتحديات

Simulated legacy / manual baseline

Area	As-is	Consequence
Stock & lots	Stock cards in spreadsheets; expiry on cartons	Expired stock sold; slow recalls
Serial equipment	Serials on paper delivery notes	Weak warranty and traceability
Credit	Balances in spreadsheet; 45-60 day hospitals	Over-exposure; slow collection
Returns	Returned goods back on shelf	Unreported losses; risk to patients
Accounting	Quarterly count; late adjustments	Margins and stock value unknown until close
Branches	Results compiled manually	No single view of performance

Project objectives and expected outcomes

الأهداف والنتائج المتوقعة

- Full lot / serial / expiry traceability with FEFO picking
- Quarantine of failed, returned, damaged and near-expiry stock
- Automated valuation reconciled to the ledger every month-end
- Credit control and ageing for institutional customers
- Branch-level sales and margin visibility
- Bilingual Arabic / English documents (RTL)

75
requirements with IDs, owners and acceptance criteria

77
UAT test cases

29
gaps analysed (GAWF)

101
accounts in the proposed chart

Expected outcomes: faster recalls, fewer expiry write-offs, accurate stock value, controlled receivables.

Project scope and exclusions

النطاق والاستثناءات

In scope

- Contacts, Sales, CRM, Purchase, Inventory, Accounting
- Warehouses, routes, lots, serials, expiry, FEFO
- Chart of accounts, journals, VAT, valuation
- Master data and 5-month simulated history
- BRD, RTM, SSD, GAWF, TPD, FPD, UATD
- CSV import package and validation report

Out of scope / not claimed

- Live Odoo installation, import or functional testing
- Payroll, manufacturing, e-commerce, POS hardware
- Statutory tax filing and e-invoicing integration
- Custom modules (proposed only, optional in FPD)
- Official Egyptian statutory chart (proposed chart only)
- Verified real customers or authorized distributors

Project team and responsibilities

فريق المشروع

Five members, all 45 register tasks at 100% (documentation level)

Mohamed Mahmoud Abdel Bary

Team Leader - Apps, Settings, Permissions & Design

- App installation, general settings, companies and branches
- Users, access rights, record rules and approval workflows (permissions)
- Solution design, GAWF, SSD and final integration of all documents
- Project governance, presentation and final review

Mohamed Essam El-Din Youssef

Sales & CRM

- Sales and CRM configuration: pipeline, quotations, pricelists, sales teams
- Customer master data and contract pricing (preparing and uploading files)
- BRD, RTM and business process documentation
- Sales and CRM test scenarios and business acceptance

Ahmed Mahmoud Mohamed

Inventory & Data Upload

- Inventory configuration: warehouses, locations, routes, lots, serials, expiry, FEFO
- Product master, opening stock and reordering rules
- Data upload: preparing and importing all CSV files and data quality checks
- Technical proposal, go-live plan and package validation

Fathy Adel Fathy

Purchase, Quality & Testing

- Purchase configuration: vendors, RFQ and PO, approvals, vendor pricelists
- Quality inspection, receipts follow-up and supplier returns
- UAT execution, defect log and test documentation
- User's guide, training and final quality assurance

Omnia Haitham

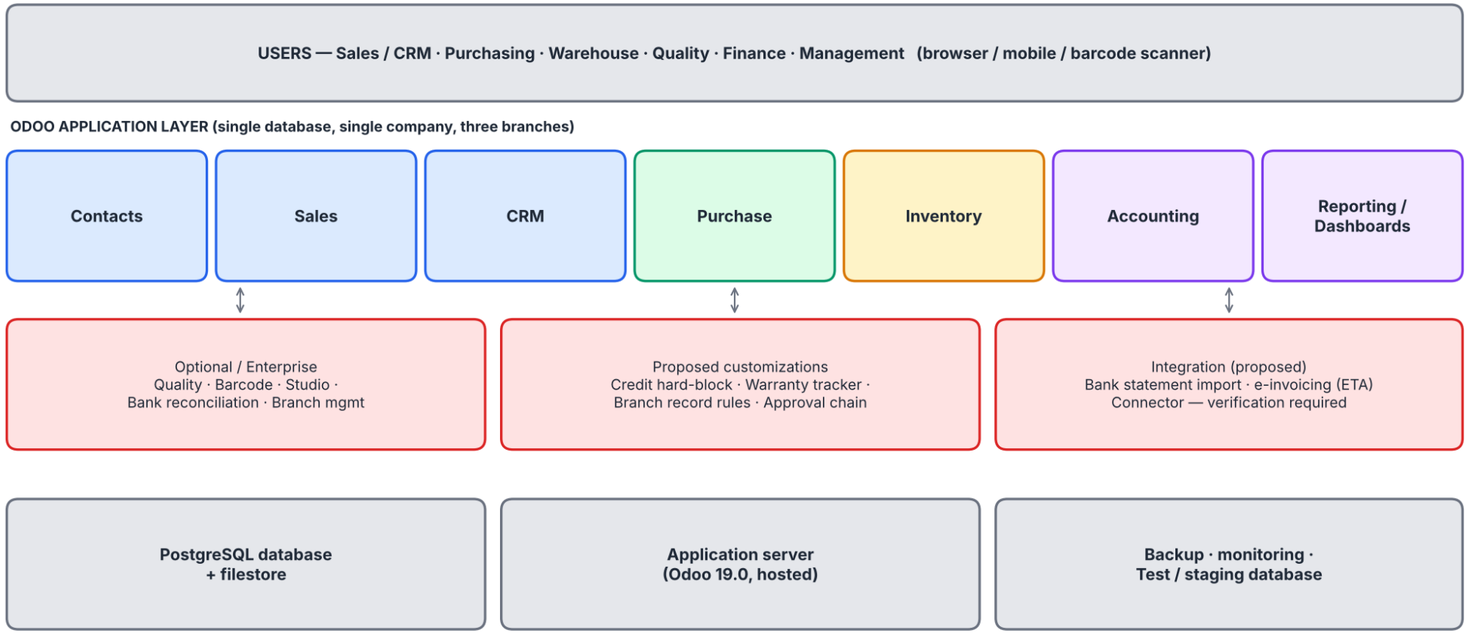

Accounting & Finance

- Accounting configuration: chart of accounts, journals, taxes, payment terms
- Invoices, bills, payments, credit notes, bank and cash
- Opening balances, stock valuation and financial reconciliations
- Financial proposal (FPD) and accounting test scenarios

Odoo architecture and selected modules

هيكل النظام والوحدات

Odoo 19.0 (Enterprise edition assumed)

Red boxes = Enterprise-only, optional or proposed work; not claimed as installed or tested.

- Standard: Contacts, Sales, CRM, Purchase, Inventory (+ Product Expiry), Accounting
- Enterprise / optional: Quality, Barcode, Studio, dashboards
- Proposed customizations: credit hard-block, warranty tracker, branch record rules, approval chain
- Red boxes = not installed or tested

Branch and warehouse structure

الفروع والمخازن

Single legal company; branches are reporting units, warehouses are stock structures

Code	Warehouse	Branch	Purpose
EQP	Main Equipment Warehouse - Nasr City	BR-NSC	Receiving, storage and dispatch of capital medical equipment (serial-tracked)
CON	Medical Consumables & Disposables Warehouse - Maadi	BR-MAA	Lot- and expiry-tracked consumables; FEFO picking; retail counter supply
SPR	Spare Parts Warehouse - Mohandeseen	BR-MOH	Spare parts, filters and batteries for installed equipment
QRT	Quarantine & Returns Warehouse - Central Cairo	BR-NSC	Isolation of failed-inspection, returned, damaged and near-expiry stock pending disposition

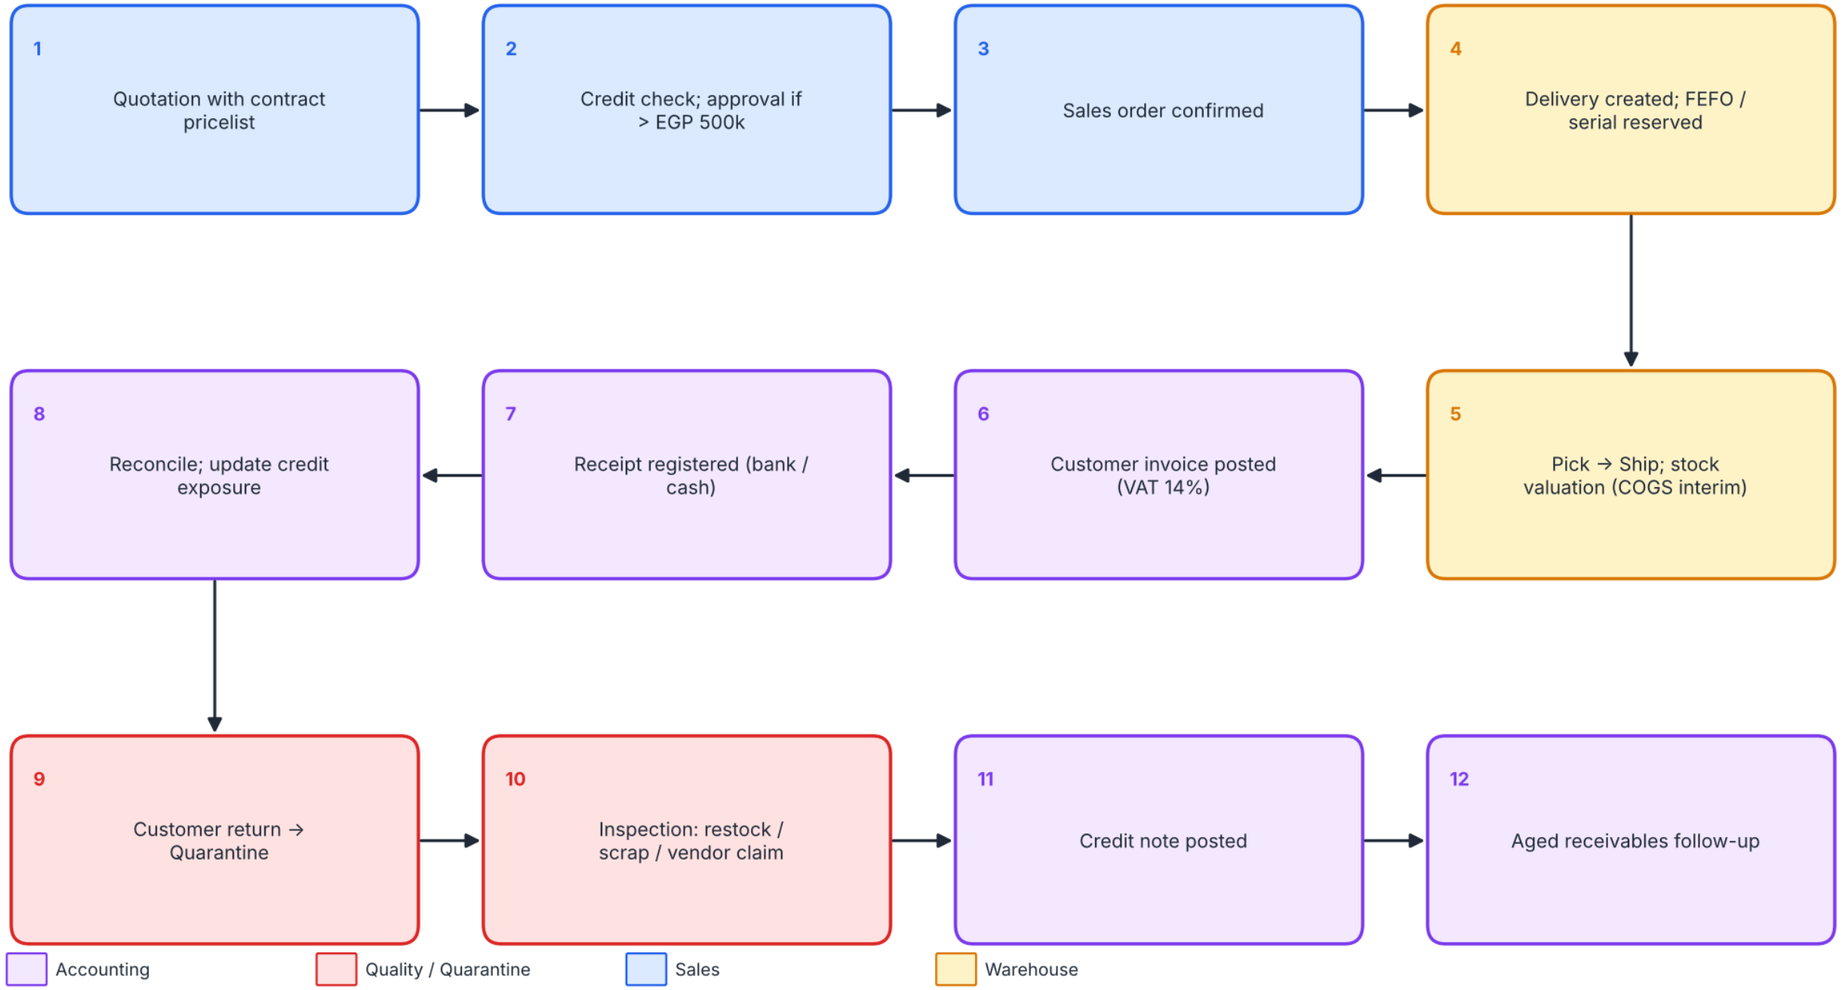

Branch	Role
Nasr City Branch (BR-NSC)	Main Headquarters and Administration - 45 Makram Ebeid St, Nasr City, Cairo, Egypt
Maadi Branch (BR-MAA)	Retail and Distribution - 18 Road 9, Maadi, Cairo, Egypt
Mohandeseen Branch (BR-MOH)	Sales Office - 22 Syria St, Mohandeseen, Greater Cairo, Egypt

Limits of standard branch handling: separate branch balance sheets, branch-specific numbering and warehouse-level access rules need branch records (edition-dependent) or proposed customizations.

Procure-to-Pay

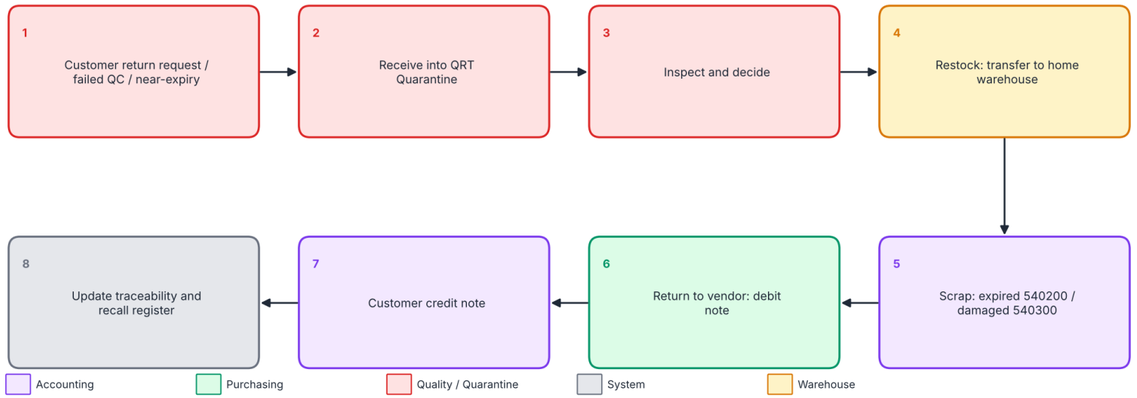

دورة المشتر

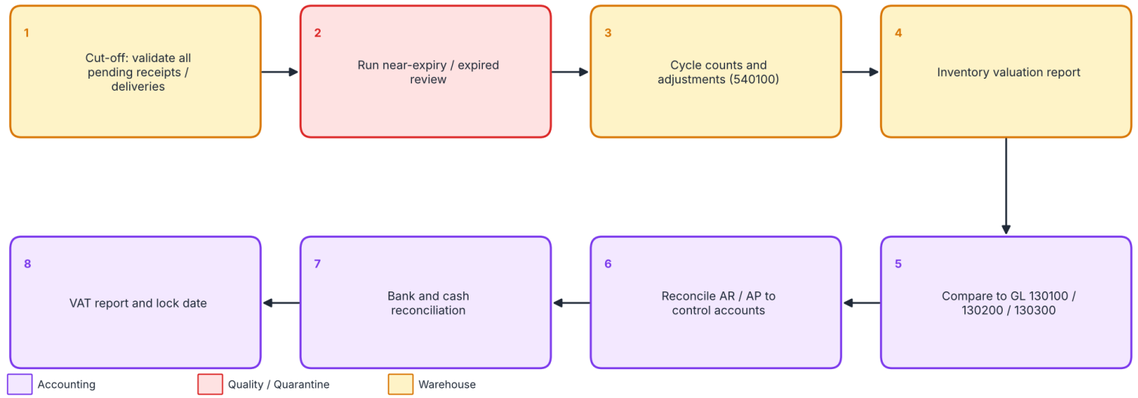

Workflow 3: Returns, quarantine, period close

المرتجعات والحجر والإقفال

Returns and Quarantine

Period-End Inventory and Accounting Reconciliation

- Return/failed/near-expiry goods move to the Quarantine & Returns warehouse (excluded from sale)
- Disposition: restock, vendor return with debit note, or scrap to 540200 / 540300
- Month-end: valuation vs GL, AR/AP vs control accounts, VAT, lock date

Accounting design

التصميم المحاسبي

Account mapping connects categories, valuation, revenue, COGS and adjustments

Category	Valuation	Revenue	COGS	Interim / loss accounts
Equipment	130100	410100	510100	130600 delivered; 210500 received
Consumables	130200	410200	510200	540200 expired; 540300 damaged
Spare parts	130300	410300	510300	540100 count adjustments
Returns / VAT	-	420100 returns	-	220100 VAT out; 140300 VAT in

- 101 accounts, 6 digits, hierarchical groups; proposed chart - accountant review required
- Journals: INV, BILL, STJ, MISC, OPEN + CIB1, NBE1 (simulated banks) + 3 branch cash safes
- FIFO, automated valuation, Anglo-Saxon (stock interim accounts)
- VAT 14% is an assumption to be confirmed by a tax advisor
- Simulated trial balance: 737 entries, balanced at EGP 222,538,043

Inventory tracking: lots, serials, expiry and FEFO

تتبع المخزون

186
serial-tracked equipment units

42
lot / batch rows

548
stock moves (5 months)

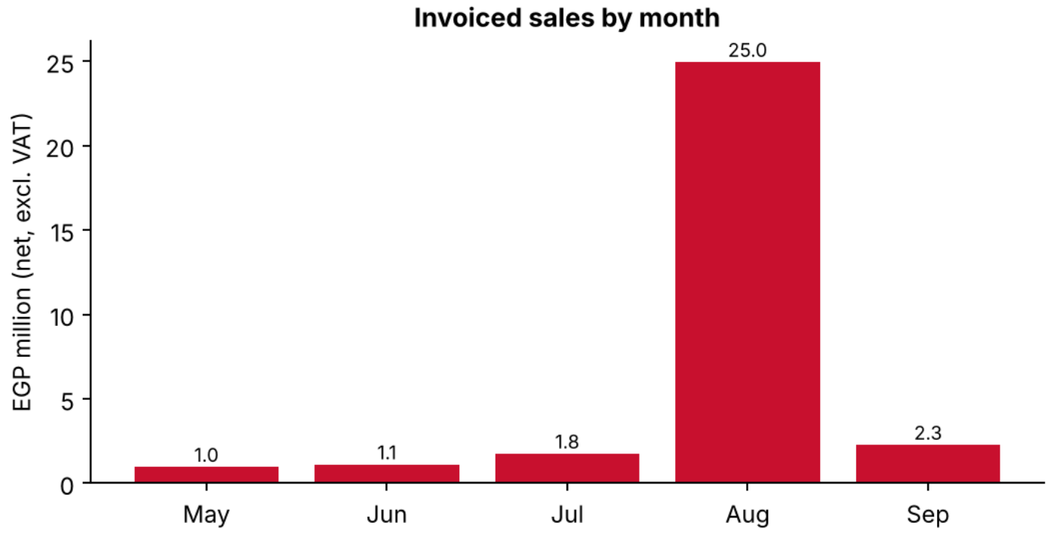

32 / 32
tracked warehouse rows reconciled

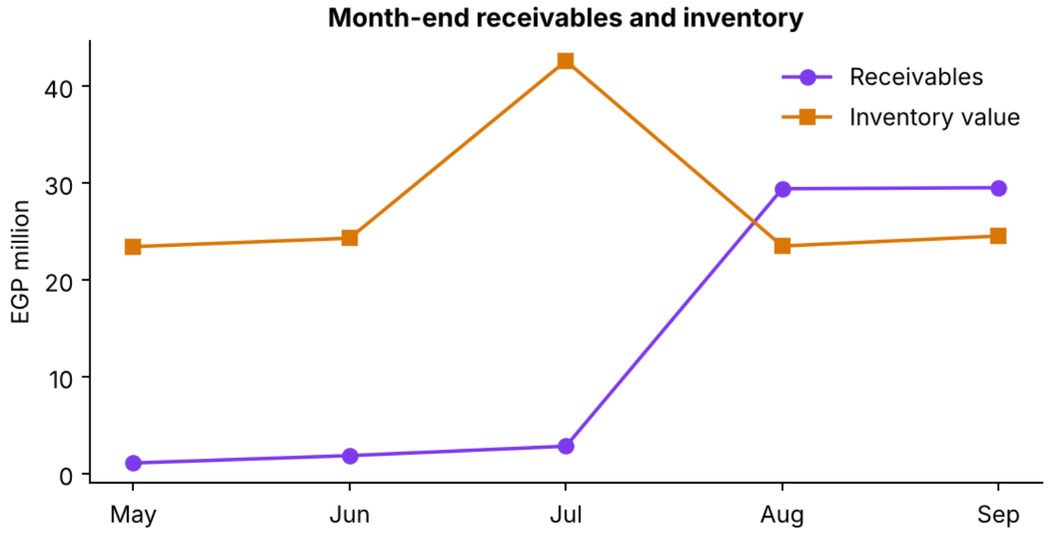

- Equipment: unique serial per unit; warranty end date per delivered serial (proposed tracker)
- Consumables: lot + expiry; FEFO removal; lots <60 days excluded from sale and isolated monthly
- Quarantine warehouse: returns, failed QC, damaged and near-expiry stock
- Identity checked for every product and warehouse: Opening + In - Out = Closing
- Simulated losses: expired EGP 46,000, damaged EGP 55,795, count differences EGP 6,405

Simulated five-month results

نتائج المحاكاة

1 May 2026 – 30 September 2026 (EGP, excl. VAT)

EGP 30,233,232
net sales after credit notes

EGP 6,330,266
gross profit (20.9%)

EGP 29,532,073
receivables 30-Sep

EGP 24,536,323
inventory value 30-Sep

One MRI system sale (EGP 23,438,252, August) is 77% of five-month sales; without it net sales are EGP 6,794,980.

Migration approach and validation strategy

نهج الترحيل والتحقق

Step	Action	Validation
1	Chart of accounts, journals, taxes	101 accounts, unique codes
2	Warehouses, locations, categories	4 warehouses, 8 locations, 10 categories
3	Products, partners	24 products, 13 customers, 6 vendors
4	Lots and serials, opening stock	186 serials unique; opening EGP 24,170,200
5	Reordering rules	23 rules
6	History (reference / scripted)	Reconcile to trial balance

- CSV import package (16 files) + README with order, dependencies and limits
- A set of CSV files is not an Odoo backup; settings, routes, taxes and rules are manual
- Automated validation: keys, duplicates, dates, quantity and value reconciliations (structural, not functional testing)

UAT and project completion status

الاختبار وحالة الإنجاز

45 / 45
project tasks at 100%

77
UAT test cases

50
passed - simulated review

27
not executed - need live Odoo

- 100% means the documented deliverable exists - not that Odoo was installed
- Passed (simulated review) = behaviour reviewed against the scenario and simulated data; evidence is simulated
- Enterprise, customization, security and performance tests wait for a live staging build
- All 75 requirements have at least one test case (RTM); 19 flagged for customization / verification

Module	Requirements	Tests	Passed (simulated)	Needs live Odoo
Contacts	4	4	2	2
Sales	9	10	7	3
CRM	8	8	7	1
Purchase	7	7	7	0
Inventory	17	18	14	4
Accounting	12	12	7	5
Reporting	4	4	3	1
Security	5	5	0	5
Non-functional	4	4	0	4
Migration	5	5	3	2

KPIs, expected benefits and risks

المؤشرات والمخاطر

KPI	Target / simulated
Recall trace time	< 15 min per lot
Expired lots sold	0 (lots <60 days excluded)
Valuation vs GL difference	0 or explained
Gross margin	20.9% (simulated)
Return rate	2.7% of gross sales

Risk	Mitigation
Branch limits in standard Odoo	Analytic plan, groups, custom rules
Enterprise features missing	Manual checklists
VAT / tax settings	Accountant review
Import errors	Rehearsal + reconciliations
Adoption	Training + super-users

Expected benefits: faster recalls, fewer expiry losses, accurate perpetual stock value, credit control, branch visibility, bilingual documents.

Conclusion and next steps

الخلاصة والخطوات التالية

- Delivered: 16 documents/workbooks, 15-file CSV import package, validation report - internally consistent and reconciled
- Design answers the key business risks: traceability, quarantine, valuation, credit, branches
- Honest status: simulation only; Enterprise and customization items require live verification

Next steps

- Confirm Odoo version / edition and branch-management availability
- Stand up staging; import package; rehearse migration
- Execute UAT on staging; close the 'not executed' tests
- Accountant review of chart, VAT, withholding, e-invoicing
- Decide on optional customizations (FPD)

Thank you - شكرا لكم
